BLUE VIEW ROCK GARDENS

HARDY ALPINE & ROCK PLANTS

P. O. BOX 363

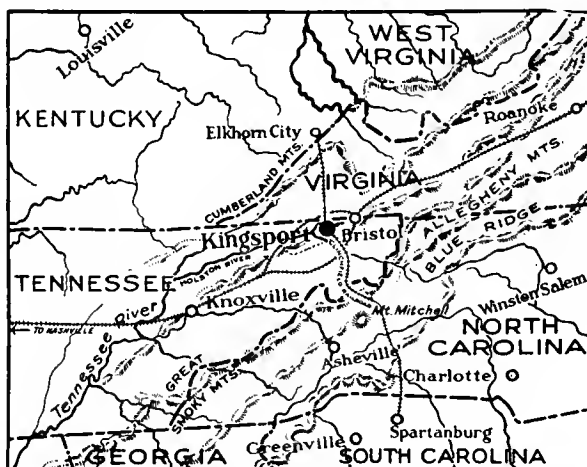

Mrs. B. K. Bright

KINGSPORT, TENNESSEE

U. S. Highway 11-W.

1.9 Miles East of Kingsport.

BLUE VIEW ROCK GARDENSIn The Heart Of The AppalachiansSave This Catalog.

As new plants prove their worth we will issue lists describing them. This catalog will be reissued only when sufficient new additions to our present plantings will warrant it. The lists are released and mailed to you from time to time will keep it up to date. This catalog is good until you receive a new one.

QUALITY: One and two year transplanted. Grown in a natural environment. 1450 feet above sea level in the heart of the Appalachians. Every variety marked with a permanent label. No foreign weeds will be introduced into your garden as all plantings are kept weeded clean.

GUARANTEE: We have an interest in your purchase other than to make a sale. We want you to get the fullest joy out of your planting. We will gladly supply you with information and help on your problems. Do not hesitate to call on us.

We will replace or refund your money if you are not pleased with our plants.

TERMS: Cash on all orders less than \$5.00. 30 days credit on orders more than \$5.00 if trade or bank references are satisfactory.

SHIPMENTS: Will be made at the proper time for planting. You will receive a notice in advance of the day shipment is made. Shipments will be made express collect. We will allow a 10% discount on purchases at nursery (if we can save packing) by taking plants with you.

NOTES ON PLANTING: All gray leaved plants want well drained soil and sun (generally dry).

Leaves with small hairs on underside require position where the sun is reflected upward.

Plants with hairs on leaves and stems require sun.

Narrow leaved plants want dry situation (Some partial shade).

Plants with long tap roots are resistant to drouth.

ACAENA-Newzealand Burr

Glauca. Little known in this country. Evergreen trailing groundcover, with small fern-like blue-green leaves. Is especially happy in part shade. Wet or dry soil.

Microphylla. Forms neat compact evergreen masses. Stands full sun. Wet or dry soil. A splendid ground cover under shrubs, but do not use where burrs will catch on clothing.

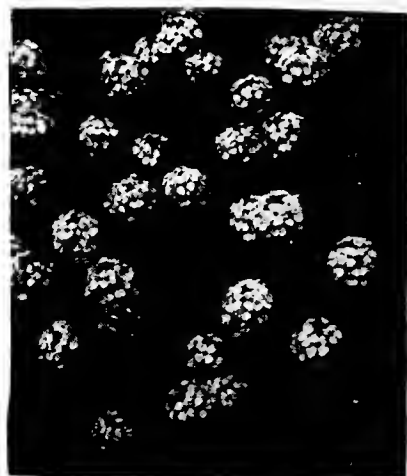

ACHILLEA-Yarrow

Ageratifolia. Silvery foliage with large white flowers, 8" high. Blooms in May-June. Plant in dry sunny situation.. Lime loving.

ACHILLEA TOMENTOSA

Tomentosa. Gray foliage, compact growing, with brilliant yellow flowers, June-September, on 6"-8" stems. Plant in full sun and dry situation. Lime loving.

AETHIONEMA PERSICUM

AETHIONEMA-Persion Candytuft

Persicum. Beautiful blue-green foliage, evergreen. Forms small shrublet with lovely rosy pink flowers in May-July on stems 6"-8" high. Any well drained sunny spot. Lime loving.

AJUGA-Bugle

Genevensis. Deep blue flowers, 6"-10" high in May and June. Shade or Sun. Lime loving. An excellent ground cover. Plant 8 - 10 inches apart.

Reptans Rubra. Purple-blue flowers and bronzy foliage. Blooms May-June. Grows 3"-5" high. Sun or Shade. Lime loving.

ALLIUM THIBETICA

An onion with Hyacinth like flowers.

ALLIUM

Thibetica. Blooming freely in July-August, with clusters of lilac-mauve flowers. Grows in ordinary soil and a sunny situation. Grows about 12" high. Plant 6" apart.

ALYSSUM-Basket of Gold.

Argenteum. With dense silvery gray foliage. The flowers are yellow in clustered heads, about 15" high. Happy in ordinary garden soil.

Saxatile Compactum. Yellow clusters of flowers in early spring. Any ordinary well drained garden soil in sunny situation. Lime loving.

Saxatile Fl. Pl. A rare double flowering form of above. Flowers are a deeper yellow with a longer season of bloom. Culture same as above.

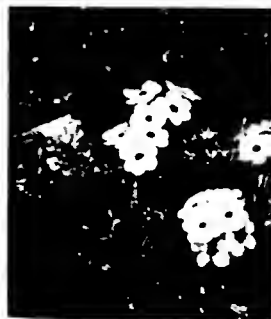

AUCHUSA-Bugloss

Myosotidiflora. A distinct dwarf specie from Russia. Small brilliant forget-me-not blue flowers in April-May. Culture: Plant 8" apart sun or shade. Well drained soil.

ANDROSACE-Rock Jasmine

Lanuginosa. Silvery leaves on trailing stems and terminal umbels of lilac pink flowers. In bloom June to Autumn. Requires sun and well drained soil.

Sarmentosa Chumbyi. Makes a pretty rosette of silky foliage. Pink Verbena-like blossoms, 4" high. Requires sun and well drained soil.

ANDROSACE
Sarmentosa Chumbyi

ANEMONE-Pulsatilla

ANEMONE-Pasque Flower.

Pulsatilla. Large violet blue flowers in early spring. Plant in full sun in well drained soil. Grows 6"-10" high.

Hupehensis. Mauve rose flowers in Aug.-Sept. Ordinary soil. Grow 18"-24" high. (Invading unless kept in check.).

ANTENNARIA-Cats Ears

Dioca Rosea. A compact ground cover for poor soil and dry sunny situations. Foliage attractive with its silvery sheen. Pale pink flowers in May. Flower heads are sometimes dyed as everlasting.

ANTHEMIS-Golden Marguerite

Tinctoria. Pretty yellow daisy-like flowers in June-July. About 18". Average garden soil.

Aizoon. Silvery foliage with lovely white flowers in May-June. 6" high. Average soil.

Achillea Tomentosa and Alyssum are beautiful on top and edge of the wall garden, in sun.

AQUILEGIA-Columbine

Coerulea. Beautiful Rocky Mt. blue Columbine. To be the emblem of the American Rock Garden Society. Blooms May-June. Plant in good garden loam.

Flabellata Nana Alba. A lovely dwarf specie from Japan. Very attractive foliage with ivory white flowers in May-June. 12"-15" high. Soil well drained.

Pyrenaica. Lovely deep blue flowers with short spurs. 4"-6" high. A gem.

ARABIS-Rock Cress

Alpina Fl. Pl. Pretty double white flowers in April & May. Plant in any good garden soil. Shade or Sun. About 5" high.

ARABIS-Alpina Rosea

Alpina Rosea. A lovely pink flushed form. They ask little in the way of soil. Can be easily introduced into the interstices of walls and fissures of rocks. Full sunshine. 6" high

Kellereri. Compact with grey foliage and white flowers. About 4"-6" high.

ARENARIA-Sandwort

Grandiflora. Grassy like foliage, covered with pure white flowers in May-June. A rock garden gem. Easy culture under ordinary garden conditions.

ARMERIA-Thrift or Sea Pink

Cephalotus Rubra. One of the showiest of the thrifts. Large heads of deep pink flowers in May-June. 12" high.

Laucheana. Evergreen foliage. Flowers rosy red in May-June. 4"-6" high.

Maritima. A lavender pink form of above.

ARRHENATHERUM-Oatgrass

Bulbosum Variegatum. A decorative, tufted, dwarf grass. Grows 8"-10" high.

ASTER-Species

Alpinus. Neat dwarf, 9" high. Large violet blue flowers in May-June. Full sun.

ASTER-Alpinus

Alpinus Alba. Same as above with white flowers. Plant in full sun.

Frikarti. One of the finest of the hardy asters. Large lavender blue flowers on 18" stems. 2 feet high.

Mauve Cushion. Literally smothered with delicate mauve flowers 1 1/2" in diameter, from Oct.-Nov. Plant in full sun.

ASTER-Hardy Dumosus Hybrids

Charming in the rock garden. All bloom during Sept. and are completely covered with blooms.

Countess of Dudley. Clear pink flowers with yellow eye. 12"-15" high. Free bloomer.

Lady Henry Maddock. Clear pale pink dwarf compact habit. 12" high.

Marjorie. Large bright rose pink, later blooming than other varieties. 12" high.

Nancy. Of dwarf bushy habit and very free flowering, the plants being covered with pale flesh pink flowers. 12" high.

Ronald. Pleasing bright shade of lilac pink with rose-pink. Very showy.

Snowsprite. A very dwarf and distinct variety, forming compact clumps, smothered with large semi-double white flowers.

Victor. The most dwarf of all and perhaps the prettiest. The flowers are of good size and of beautiful clear pale lavender blue. Only 8" high.

AUBRIETIA

This is one of the rare groups of plants whose garden hybrids or varieties are to be preferred for the rock garden.

They delight in open dry situations, and are especially suited for walls and rockeries.

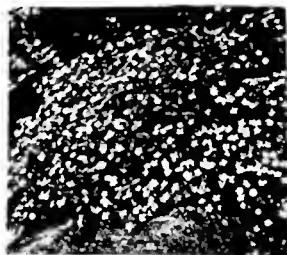

Bloom from early spring until June.

Eryii. (Original specie) Grows 2"-3" high, and is covered with light violet blooms.

Leichlini. (Hybrid) A rosy carmine and very compact.

Purpurea. (Original specie) Pretty purple. Grows 3" high.

Large Flowering Hybrids. A lovely rock plant, with masses of various bright colored flowers from April to June

AUBRIETIA

BUPHTHALUM-Ox-Eye

Salicifolium. A pretty yellow composite. Grows on poor soil. Will be most happy if it can receive an average moisture condition.

CALAMINTHA-Calamint

Alpina. A pretty dwarf alpine for the rocks. The flowers are lavender. Foliage is green with a bronze cast. About 6" high. Prefers a sandy loam.

CALLIRHOE-InvolucrataCALLIRHOE

Involucrata. Pretty trailer. Pleasing foliage covered with crimson flowers all summer.

CAMPANULA-(Bell Flower)

Alliariaefolia. Grows about 2' high and very showy creamy white spikes of flowers.

Carpatica. (Carpathian Harebell) Neat and compact habit. Blooms in June with large cup shaped blue flowers. 6" high.

Carpatica Alba. White form of above.

Carpatica Nana. Only 4 inches high, and with blooms in various shades of blue

CAMPANULA-Garganica

Muralis. In June the showers of purplish blue flowers, over a compact foliage, creates an interesting picture in the rock garden. A rare and desirable alpine. At home in a sunny rock wall. 6" high.

CAMPANULA-Muralis

Rotundifolia. (Blue bells of Scotland). A continuous bloomer, with its tiny blue bells on slender stems. A pretty subject for the rockery. Asks little in the way of soil, loving the full sunshine. About 12" high.

CAMPANULA-Turbinata

Turbinata. Compact in habit. Cup shaped purple flowers. Beautiful at the top of a sunny wall. Sunshine and average soil

CATANANCHE-Cupids Dart

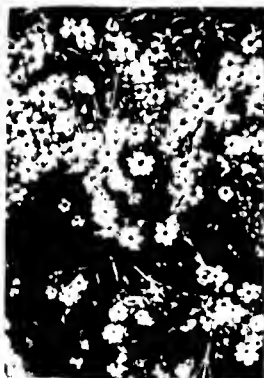

Caerulea. Large sky blue flowers. Can be dried as everlasting. Grey grass like foliage. One of the prettiest shows on a dry sunny rock slope. Light deep soil

CATANANCHE-Caerulea

FOR THE SUNNY STEPS

- AUBRIETIA - Eryii
- CAMPANULA - Carpatica Nana
- DIANTHUS - Deltoides
- LINARIA - Aquitribloba
- SEDUM - Acre, Lydium, Sexangulare, Ternatum

CERASTIUM- Snow-in-Summer

CERASTIUM-Tomentosum

Tomentosum. Pretty silvery grey foliage covered all summer with attractive pure white flowers. Wants sun. For a difficult wall it is a sturdy standby. Grows 6" high.

CERASTOTIGMA (Plumbago)

Plumbaginoides. A dwarf bushy plant with Gentian blue flowers in close trusses at the end of the shoots. Plant in well drained soil in either half shade or full sun. 8"12" high.

CHEIRANTHUS-Wallflower

Allioni. Covered with brilliant orange flowers that makes a superb show in spring. Beautiful in the wall garden. Best treated as a biennian. Full sun, 12" high.

CRYSANTHEMUM

Arcticum. One of the easiest and best of the fall flowering plants suitable for rock garden. From Sept. until hard frost it is a mass of white daises. 15" high.

CRYSANTHEMUM-Arcticum

Amelia (Pink Cushion) A lovely dwarf, covered with double pink flowers from June until frost. 12" high.

CRUCIANELLA -Crosswort

Stylosa. Is a treasure in the rock garden, forming dense carpets of grey-green foliage. From May to Nov. covered with masses of flesh rose flowers in terminal clusters. Half shade or sun.

DELPHINEUM

Tom Thumb. Dark blue flowers all summer. Dwarf and compact. Rich loam and well drained soil. 9"-12" high.

DIANTHUS-PinkDIANTHUS
Alpinus-Allwoodi

Alpinus Allwoodi. A beautiful dwarf with flowers of exquisite coloring.

Arvenensis. Little tufts of grey studded with rosy pink flowers in May June. Fragrant. About 4" high.

FOR CHINKS IN SUNNY WALLS

- ACHILLEA - Ageratifolia, Tormentosa
- AETHIONEMA - Persicum
- ANDROSACE - Sarmentosa, Lanuginosa
- AUBRIETIA - Leichlini
- CAMPANULA - Garganica, Muralis

DIANTHUS (Continued)

Caesius. (Cheddar Pink) Spiny glaucous foliage. Fragrant pink flowers in June. About 6" high.

Deltoides. (Maiden Pink) Forms a pretty mat which is covered with pretty bright pink flowers in June & July. 4"-6" high.

Deltoides Alba. Same as above only flowers white.

Deltoides Brilliant. A pretty crimson form.

Latifolia. Flowers large double in close heads. Good colors. 6"-12" high.

Plumarius. Fl.Pl. Very fragrant Scotch pinks. Choice double flowers in rose, purple, white and variegated colors from May-Sept. 12" high.

DICENTRA-Bleeding Heart

DICENTRA-Eximia

Eximia. Dwarf growing, with beautiful finely cut foliage and pink racemes of flowers all summer. At home in shade or full sun. 15" high.

DODECATHEON-Media

DODECATHEON-American Cyclamen

Media. (Shooting Star) Best in moist soil and part shade. Light Soil. Pretty flower heads of pale rose and sometimes yellow in early spring. 12" high.

DRABA-Whitlow Grass

Fladnizensis. Dwarf saxatile plant forming rosettes of evergreen foliage. White flowers in early spring. Shade or sun. 3" high.

Repens. Pretty lemon yellow flowers in spring, and again in fall. Shade or full sun. 4"-6" high.

EDRALANTHUS- Wahlenbergia

Dalmaticus. A choice rock plant of the campanula family. Clusters of bright purple blue flowers in June. 4" high.

EPIGEA-Mayflower

Repens. (Trailing Arbutus) The sweet fragrant light pink waxy star flowers in clusters nestled among the evergreen leaves, is a pleasure never to be forgotten. It is a lime hater and is most difficult in some sections. Must have shade and acid soil.

FOR CHINKS IN SUNNY WALLS.

EUPHORBIA-Myrsinites
DIANTHUS -Allwoodi, Caesius
NEPTA -Mussini
TUNICA -Saxifraga

ERINUS-Liver Balsam

Rosea. A pretty draw plant. Glabrous foliage, light rose flowers May-July. Well suited for the rockery, walk and wall garden. Light soil, full sun. 4"-6" high.

ERODIUM-Heronbill

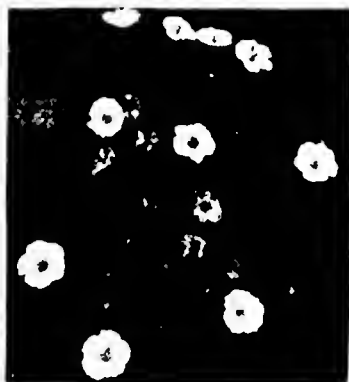

Chamaedryoides Rosea. Geranium with aromatic foliage. It is happy in rock and lime soil. Must be in well drained situation. Covered in May to Nov. with delicate pink veined crimson flowers. We grow only the one variety now, as they hybridize easily. 3"-5" high.

EUPHORBIA-Spurge

Myrsinites. Very showy blue foliage of trailing habit. Heads of pale yellow flowers in May. Very ornamental. A sheltered and sunny situation. Beautiful in the rock wall.

FESTUCA-Fescue Grass

Glauc. Silvery blue foliage. 6" high.

GERANIUM-Cranesbill

Lancastriense. A new lovely dwarf gem for the rockery. The light salmon pink flowers appear on and off all summer. Wants sun and well drained soil. The roots strike deeply, so choose its location for permanency. 4" high.

GERANIUM-Lancastriense

GEUM-Avens

Heldreichii. Beautiful orange-red flowers in May-June on 12"-15" stems. Very hardy in a good light soil. Stands full sun.

GLOBULARIA-Globe Daisy

Cordifolia. A prostrate shrublet with glossy evergreen foliage. Lilac blue flowers on 3"-6" stems. They want a sunny and dry situation.

Tricosantha. Compact evergreen foliage and lilac blue globe shaped flowers in May-June. About 12" high. A very sunny place and dry situation.

GYPSOPHILA-Babys Breath

Repens. A low creeping carpeting plant with white and pink flowers in May to Sept. A good wall or rock plant. Loves lime. 3" high.

HELIANTHEMUM-Sun Roses

Buttercup. Evergreen prostrate shrublet with single golden yellow flowers.

Clara Middleton. Same as above, with single rich orange flowers.

Fireball. Same as above with bright scarlet double flowers. The sun roses prefer lime and well drained gravelly soil. They do not like manure and flower most profusely in poor soil.

HEUCHERIA-Coralbells

The coralbells are best planted in light soil, in part shade or full sun.

Hedge Hall. Nice and graceful with large bell shaped salmon pink flowers in May-July. 15"-18" high.

Perrys White. Dwarf and compact. Pure white flowers on 12"-15" stems from May to July.

Sanguinea. Bright coral rose flowers on stems 12"-18" high in June-September.

Hypericum-St. Johnswort

Reptans. A treasure to be cherished. It forms a dense prostrate mat with deep green foliage, on which recline the large old gold flowers. The flowers are preceded by buds of rich blood crimson. 4" high. Ordinary soil and sun.

IBERIS-Candytuft

Little Gem. A dwarf and compact evergreen form. White flowers in early spring. Good for sunny places in rockery or on slopes.

Sempervirens. Evergreen shrublet about 8"-10" high. White flowers in spring. Full sun, ordinary soil.

INCARVILLEA-Gloxinia

Delavayi. Plant in rich sandy humus, well drained. Marvelous flowers of rich rose on 15" stems in June. Shade or sun.

IRIS-Species

Arenaria. (Species) A lovely little iris with large yellow flowers in May. 3"-4" high. Should have full sun and well drained soil composed of peat or leafmold.

Cristata. Pretty lilac blue flowers on 6" stems in May-June. Creeping habit. Full sun and well drained soil containing leafmold or peat.

Cristata-Alba. A rare white flowering form. Culture same as above.

IRIS-Pumila

Fairy. Beautiful pale blue flowers in April. 4"-6" high.

Orange Queen. Orange-yellow flowers in April. 4"-6" high.

Sambo. Deep blue flowers in April. 4"-6" high.

Verna. Blue lilac flowers in May. 4" high

The Pumila type will do well in ordinary soil and full sun.

IRIS-Pumila

LAVENDULA-Lavender

Vera. Fragrant lavender flowers on 15" stems in July and August. Should have a dry sunny place in the rock garden.

LINARIA-Toad Flax

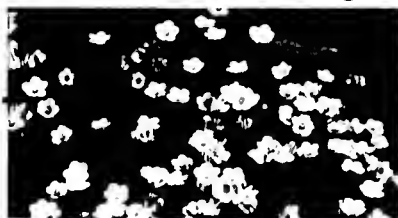

Aquitriloba. A creeping gem about 1" high covered with pale violet flowers from spring to summer. Partial shade or full sun.

LINUM-Flax

Alpinum. A fine dwarf species. Pretty snap dragon like flowers of light blue from May to Sept. Well drained, poor, light soil. Sunny situation. 6"-8" high.

Campanulatum (Flavum). Seldom seen in the rock garden. June sees the butter-yellow blooms thickly crowding the plants. Blooms are nearly an inch across. Blooms steadily thru June and July, then starts in August and continues until September. Well drained soil and sun. 6"-10" high.

Perenne. Flowers azure blue on stems 18" high. Ever-green foliage very attractive. All the Linums are glorious in the rock garden. Ordinary well drained soil and sun

LINUM-Perenne

LOTUS-Ladys Fingers

Corniculatus Fl. Pl. A pretty trailer with double yellows, like a dwarf pea, in August and September when bloom is needed in the rock garden. Average soil and full sun.

LYCHNIS-Campion

Alpinus-Rosea. An extremely beautiful plant with light pink flowers in June. 4" high.

Viscaria Fl. Pl. Heads of brilliant carmine flowers in May and June. 12"-15" high.

MAZUS

Reptans. Resembles some of the small lobelias. A close creeping ground cover for shade or sun. Covered in early spring with dainty lilac flowers with a white lip. Should be appreciated more in the South. About 2" high.

MERTENSIA-Virginia Bluebell-Lungwort

Virginica. One of the loveliest of the spring blooming plants. Flowers are sky blue. Needs a deep loamy soil. For half shade or sun; moist or dry places. 12"-15" high.

MYOSOTIS-Palustris

MYOSOTIS-Forget-Me-Not

Palustris-Semperflorens. Azure blue flowers with a gold eye. Blooms from May until fall. Will stand shade or sun, but prefers a moist soil. About 6"-8" high.

Robusta Grandiflora. A pretty improved blue variety of Palustris.

Veronica Teucrium is splendid for the top of walls, as it literally covers itself with blossoms of intense blue.

MITCHELLA-Partridge Berry

Repens. A pretty attractive native trailer with shiny evergreen foliage marked with white lines, and bright scarlet berries that remain all winter. A beautiful ground cover when once established. A soil containing leafmold or humus, and part shade will make them happy. 1" high.

NEPETA-Catmint

Mussini. A pretty grey foliage with lavender flowers from spring until fall. Must have a dry and sunny position. 12"-15" high.

OENOTHERA
Missouriensis

OENOTHERA-Evening Primrose

Missouriensis. A good trailer with large pale yellow flowers 5"-6" across, in May to August. Sandy well drained soil and full sun. 8" high.

Speciosa. White rose tinted flowers 2"-3" across all summer, on 18"-24" stems. Well drained sandy soil and sun.

PAPAVER-Poppy

Alpinum. A pretty alpine with various colored flowers of white, pink, yellow, and orange. Well drained sandy soil and full sun. 4" high.

PENSTEMON-Beardtongue

Barbatus. Scarlet flowers from June until August. Grows about 30" high. Requires a well drained sunny position.

Digitalis. A pretty white with spikes like foxgloves. Blooming in May-July. 24"-30" high. Well drained open situation.

Pubescens. Lavender blue flowers from June to August. 18" high. Hot and dry situation

PHLOX SUBULATA-Mountain Pink

Alba. Pure white flowers in April-May.

Atropurpurea. Deep Carnine red flowers. Very showy.

Lilacina. Pale blue flowers in April-May.

Rosea. Profuse blooms of rose-pink.

Vivid. The loveliest of the creeping phlox, with bright pink flowers and dark pink eye. Compact and slow grower.

The above is a spring flowering type with evergreen foliage. Should be in full sun and dry sandy soil. About 2"-4" high.

PHLOX-Species

Amoena. The best native variety for carpeting the ground. Rich bright pink lilac flowers in April-May. Plant in full sun. 4" High.

Divaricata. Has fragrant lavender flowers on 8" stems in early spring. Sun or shade.

PHLOX-Amoena

PLATYCODON-Balloon Flower

Mariesi. The large deep blue and white flowers throughout the entire summer are striking. They require a light well drained soil and full sun.

PLUMBAGO

See CERASTOTIGMA-Plumbaginoides.

POLEMONIUM-Greek Valerian

Humile. Flowers in loose heads of blue. Graceful foliage. Very showy when planted in the open in sun. Light well drained soil.

PRIMULA

Auricula. A rock garden treasure. The various colored flowers on 6"-8" stems are fragrant. They ask little in the way of soil, their roots spreading themselves among the fissures. Likes sun.

Cortusoides. Very distinct with heart shaped leaves and rosy pink flowers on 12" stems. Plant in sandy well drained soil containing peat and leafmold. Should have half shade.

Veris. In many colors and shades, from deep blue to white. Single and double flowers. Very showy. Light loam and part shade.

PRUNELLA- Self Heal

Grandiflora. A good carpeting plant with violet or blue flowers. Also good for the paved walk. Light soil and sun.

RANUNCULUS-Buttercup

Repens Fl. Pl. Creeping buttercup with pretty double yellow flowers in April-May. Plant in light loam. Full sun or part shade.

SANTOLINA-Lavender Cotton

Incana. Pretty evergreen silver-white finely divided foliage. Prized more for the foliage than the button-like yellow flowers in June. Should be placed in very dry and sunny situation. Grows about 12" high. Can be pruned like box.

SAPONARIA-Soapwort

Ocymoides. Creeping plant smothered with pretty bright pink flowers in May. Good for the sunny wall or rockery. Good ordinary soil. Sun.

SAXIFRAGA-Saxifrage

Aizoon (Encrusted) Flowers white, spotted with pink. Will succeed on any well drained sunny exposed place. Likes lime. Will not tolerate damp soil. 12" high.

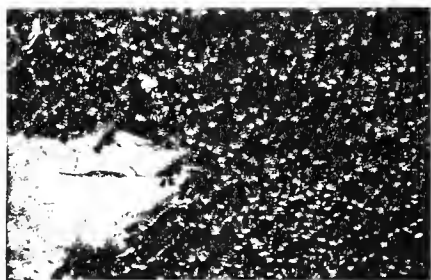

Aizoon Flavescens. Same as above but with pale yellow flowers.

Aizoon Rosea. Same as above with pale rose flowers.

For a ground cover in sunny places use Sedum Acre or Sedum Serangullare, rose thyme (Nitidus) and white thyme (Serphyllum Album).

SEDUM-Stonecrop

The ones listed here are hardy kinds suitable for rock gardens. The stonecrops are of easy cultivation, thriving in poor soil and sunny situation. All are of interesting habit and make a showy sight. Quite a few are evergreen.

SEDUM-Acre

Acre-Minor. Evergreen mats of bright green leaves. Yellow flowers in summer. 1"-2" high.

Aizoon. Yellow to orange flowers in summer. Grows 12"-18" high.

Alberti. Creeping evergreen 2" high. Flowers white 1/2" across in early summer.

Album. Creeping evergreen mat 3"-6" high. Flowers white in midsummer.

Anopetalum. Creeping evergreen about 6" high. Flowers yellow 1" across in June and July. In the fall leaves turn a pretty bronze.

Ellacombian. Forms compact clump. Grows 6"-8" high, with yellow flowers in midsummer.

Ewersii. One of the pretty sedums with flat blue-gray leaves. Flowers rosy violet in late summer. Grows 8"-10" high.

Hispanicum. Blue-gray foliage forming well rounded mats. 1"-2" high. Flowers pinkish white.

SEDUM-Hispanicum

Samchaticum. Semi-prostrate stems. 6"-10" high with orange yellow flowers in late summer.

Lydiu. Evergreen mounds which turn red in cool weather. 2"-3" high. Flowers white.

Murale. A red leaved form of Album. 3"-5" high.

Nevii. Small compact tufts. Pale green leaves in rosettes. Flowers white on stems about 3" high. A beautiful lacy effect when in bloom. Native to the Appalachians. Evergreen.

Rupestre. Evergreen creeping mats about 3"-4" high. Golden yellow flowers in summer.

Sexangulare. Creeping evergreen mats to 3" high. Flowers yellow in summer.

SEDUM-Sieboldii

Sieboldii. Admired by some as the most beautiful of the sedums. Glaucous blue foliage on arching stems 6"-10" high; and each one ending with a cyme of lavender pink flowers in Sept. - Oct.

Spectabile. Glaucous leaves on stems to 18" high. Flowers pink in Autumn.

SEDUM-(Continued)

Spectabile Variaga. Same as above except leaves are variegated

Spurium. Creeping evergreen forming mats about 2"-3" high. Pink flowers in summer. The leaves turn a pretty red in Autumn. One of the best of the sedums for a clay bank.

Spurium Coccineum. Same as above except flowers are bright red.

SEDUM-Spurium

Stenopetalum. A dark evergreen tuft 3"-4" high. Flowers a golden yellow in June.

Stoloniferum. Creeping evergreen forming mats with rose flowers in early summer. 3"-4" high.

Ternatum. Creeping evergreen shoots 6"-8" long. Flowers white in early spring.

SILENE-Schafta

SILENE-Catchfly

Schafta. A late flowering dweller for the rock garden. Flowers pink during July to October. Ordinary soil and a sunny spot. 5"-6" high.

STACHYS-Lambs Ears

Lanata. Dense soft-white-wooly leaves that soon make a large mat. Flower heads purple, but not showy. About 3" high.

TEUCRIUM-GermanderChamaedrys.

A shrub-like plant with glossy evergreen leaves. Can be clipped and will answer for dwarf box wood. Flowers purple or bright rose. Well drained soil and sun. 12" high.

THYMUS-Thyme

All Thymes want a well drained, sunny position.

Citriodorus. Leaves small and lemon scented. Flowers lilac.

Lanuginosus. Woolly grey foliage with pink flowers.

Nitidus. A shrub resembling a miniature silvery Irish yew, about 12" high. Rosy-lilac flowers in June.

Serpyllium Alba. Pretty dense mats of evergreen foliage covered with white flowers in May-June. 2" high.

TUNICA-Tunic Flower

Saxifraga Fl. Pl. Lovely double rose pink flowers in June until fall. Forms a spreading tuft about 6"-8" high. Plant in full sun, in well drained soil

The Limums give a long period of bloom in the rock garden.

VALERIANA-Garden Heliotripe

Coccinea. Grows 18"-24" high and has heads of showy old rose flowers in June until fall. Ordinary soil and a sunny situation.

VERBENA

Canadensis. A hardy verbena for the open sunny place. flowers purple and in bloom all summer. Beautiful when planted in masses. About 6" high. Ordinary well drained soil.

Venosa. A stiff growing plant about 12" high with sharply toothed leaves. Flowers purple in spikes 1"-3" long. Very pretty when massed.

VERONICA-Speedwell

Filaformis. Trailing with light blue flowers.

Longifolia Rosea. Lilac flowers in dense racemes. 18" high.

Repens. Light blue flowers in May. Grows 1"-2" high. The loveliest of the race. Fine in crevices of walks or wall gardens.

Rupestris. Makes a close mat 2"-3" high covered with bright blue flowers in May-June. Will do well in light shade.

Elegans. Flowers blue in panicle racemes, in June and July. 10"-15" high.

Teucrium. A dwarf spreading plant hidden by masses of bright blue flower spikes in May-June.

All Veronicas thrive in ordinary soil and sun.

VINCA-Periwinkle

Minor. Trailing evergreen plant for shade or sun. Lilac-blue flowers in April. Ordinary soil.

VIOLA-Violet

Arkwright Beauty. (New) Striking ruby red blooms.

Chantryland. (New) Pure apricot. The best of its color.

Mauve Queen. Light blue flowers.

Purple Glory. Rich purple flowers 2" across with a canary yellow eye from early spring to fall. Stands hot weather.

VIOLA ODORATA--Sweet Violet

Prince of Wales. A sweet scented deep purple. Will do well in shade.

Double Russian. Double sweet scented flowers. Will do well in dense shade.

Rosina. Fragrant pink and rose flowers in spring and again in fall. Part shade or sun.

All violas should be planted in well drained rich soil.
